

INFORMATION & INSTRUCTIONS

General use

Cotton, polyester, polyester/cotton blends, teamwear, caps

Characteristics

- Extra wide roll 20”(50cm)
- Can be wash at 175F°(80°C)
- The backing material is sticky which allows the production of very fine detailed logos allowing color to be applied on color with perfect registration.
- Very easy to weed, if any part of the logo lifts up, it can be easily repositioned
- Produces a matte, smooth finish which after application, can be ironed.
- Works well with a pique weave
- Available in a variety of colors: white, black, red, royal blue, navy blue, green, yellow, gold, silver, neon green, neon yellow, neon orange, sky blue, beige, grey, lemon, purple, turquoise, burgundy, forest green, chocolate brown and orange.
- MultiCut colors (excluding gold & silver) can be overlapped with other MultiCut colors, however they cannot be overlapped with GlitterCut or TuffCut.
- Manufactured on a sticky backing for easy weeding and application

Application

- Position MultiCut in cutter with matte side up.
- All designs should be cut mirrored.
- Once cut, weed out unwanted area with weeding tool or exacto knife.
- Position weeded MultiCut film on shirt.
- Ensure heat press is set at 340°F (170°C)
- Press film with medium to firm pressure for 20 seconds at 340°F (170°C)
- Release clear film while transfer is still hot
- When pressing multiple layers of color with MultiCut, place the second layer of color over the first one then cover the whole transfer with silicon paper or with the mylar peeled on the previous step (must cover the entire vinyl area) with the sticky side down (silicon paper is sold separately per sheet or you can use non waxed craft paper). Press each layer for 20 seconds.
- Silicon paper can be reused until it turns brown

Washing Instructions

- Machine washable up to 175°F (80°C)
- Tumble dry warm
- Can be dry cleaned
